

Material Status: - A material status is a combination of transactions and planning actions that you choose to disallow in a particular circumstance. Disallowed transactions and planning actions are cumulative. When you set up transaction types, you determine whether some transactions can be restricted by material status.

Here we will discuss about how to create material status

Active:- by default oracle provided this Active status.

Click on Active Status.

If it is in active status all the above transactions are allowed.

Click on Manage sub inventories and Locators

Subinventory	Description	Active	Material Status	Locator Control	Subinventory Type	Additional Information
12MINMAX	12MINMAX Testing	Active	Active	None	Storage	
APL MinMax	APL MinMax Subinventory	Active	Active	None	Storage	
Completed	Finished Goods	Active	Active	None	Storage	
Inspection	Inspection	Active	Active	None	Storage	
Minmax sub	This is used for min max testing	Active	Active	None	Storage	
Quarantine	Quarantine	Active	Active	None	Storage	
RK-12-SUB	RK-12-SUB Testing of Cycle count	Active	Active	None	Storage	
Receiving	Receiving	Active	Active	None	Receiving	
Staging	Staging	Active	Active	None	Storage	
Stores	Stores	Active	Active	None	Storage	

12MINMAX: Subinventory Details

The material status is active, so all the transactions are allowed for these subinventories.

Now I am trying to create one custom status damage

Create Material Status

Name: ☒ Active

Description:

Usage: ☒ Subinventory ☒ Locator ☒ Lot ☐ Serial Number

Availability: ☐ Allow reservations ☐ Include in ATP ☐ Nettable

Transactions: **Allowed** (Miscellaneous issue) **Disallowed** (Manufacturing Receipt, Miscellaneous Receipt, Movement Request Put Away, Project Issue, Project Material Issue, Project Transfer, Purchase Order Receipt)

Here Transaction is allowed only for Miscellaneous issue and remaining all transactions it is disallowed.

Click on ok

Name	Description	Active	Subinventory	Usage	Locator	Lot	Serial Number
Damage	Damaged not for any transactions e	✓	✓	✓	✓	✓	✓
12ON-HOLD	12ON-HOLD	✓	✓	—	—	—	—
Active	Good stock	✓	✓	✓	✓	✓	✓
Active: Not Available for Netli...	Not Available for Netting, ATP and ...	✓	✓	✓	✓	✓	—
Awaiting Destruction	Awaiting Destruction	✓	✓	✓	✓	✓	—
On Hold	On Hold	✓	—	—	—	✓	—
PAR Expense	PAR Expense	✓	✓	✓	✓	—	—
QA Review	Suspect Material Requires Quality ...	✓	✓	✓	✓	✓	✓
Quarantine	Quarantine	✓	✓	✓	✓	✓	—
Quarantine_1	Awaiting inspection or QA	✓	✓	✓	✓	✓	—
Raw Material	Unprocessed or raw material	✓	✓	✓	✓	✓	—
Recall	for recalled items	✓	✓	✓	✓	—	—

We have created one material status named damage.

From where these allowed transactions are showing, from the Inventory transaction sources and types.

From manage inventory transaction types

AT the top level, showing the transactions, down we have transaction types.

Whatever enabled are showing there in material status.

Suppose we enable here Shipment receipt adjustment to Enbale

Edit it

Edit Transaction Type

Name: Shipment Receipt Adjustment

Description: Adjustment to receipt of intransit deliver...

Action: Delivery adjustments

Defined By: Sys...

Start Date: 08-09-1995

End Date: dd-mm-yyyy

☒ Enable status control

Additional Information

Save and Close Cancel

Enable the check box, save it, now go and **check in the material status** it is showing in transactions allowed area.
